Art Unit 1711

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-24, drawn to a composition containing a hyperbranched polymer and another reactive polymer, classified in Class 525, subclass 100.

II. Claims 25-34, drawn to a moisture curable composition, classified in Class 528, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

Group I and Group II do not fall into the scope of related and distinct inventions set out in MPEP § 806.05(a)-(i).

This application contains claims directed to the following patentably distinct species of the claimed invention: Applicants are required to elect a single species of hyperbranched polymers from one of those in claim 12; applicants are also required to elect a single functional group on the hyperbranched polymers from one of those at page 7 lines 1-3 or page 8 lines 4-10; applicants are also required to elect a "second type" of polymer from one of linear polymers or lightly branched polymers or hyperbranched polymers or comb burst dendigrafts or dendritic polymers which are not comb burst dendigrafts.

Applicants are required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which

Art Unit 1711

the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

Art Unit 1711

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Due to the complexity of this election/restriction requirement, no telephone election/restriction was attempted.

Any inquiry concerning this communication should be directed to Jeffrey Mullis at telephone number (703) 308-2820.
